ty apps

Expand your fleet's capabilities

Start to finish, rely on a tablet built for today's fleets.

Wherever your fleet works, so should your tablets—even in tough conditions. The Samsung Galaxy Tab Active5 is the newest tablet in Samsung's lineup of rugged mobile devices. Built for rough handling and harsh environments, this ruggedized tablet is designed to withstand water, dust, shock, and hot and cold weather.

Not to mention inevitable drops to the ground.

Outfit drivers with the right tablet, loaded with the right tools. Simplify daily tasks, and enhance safety and compliance. All on a ruggedized mobile device.

Put every tool they need at their fingertips.

A tablet is only as useful as what's on it. Streamline everyday tasks with Zonar solutions, which are proven compatible on the Tab Active5.

- Driver workflow with TMS integration, dynamic forms and document scanning
- Electronic Verified Inspection Reporting (EVIR®)
- Hours-of-Service ELD
- Commercial turn-by-turn navigation
- Safe driver coaching
- Student rider verification
- Digital timeclock

Customize as needed.

Outfit drivers with the tools they need today. And keep customizing as you see fit.

Drivers using the Tab Active5 have managed access to Google Play-certified third-party apps, which have also been proven compatible with Zonar solutions.

More mobile tools to avoid the cost and physical hassle of adding more devices.

New, ruggedized tablet, same trusted Zonar solutions. And, once a task is completed, the data is securely uploaded to the Zonar Ground Traffic Control® web portal, where you monitor and manage your fleet.

Keep working in tough conditions.

Keep the gloves on when using the Tab Active5 in tough conditions. With enhanced touch capability settings, drivers can still use the tablet's intuitive touchscreen without removing their gloves.

Built to take a beating, the Tab Active5 withstood 23 of the MIL-STD-810G tests.

- Works in salty, foggy, dusty and icy conditions
- Withstands water immersion, rain and humidity
- Ideal operating temperature range from 32°F to 113°F
- Passed several tests, including vibrations, ballistic shocks and being dropped in transit

The Tab Active5 is even MIL-STD-810H2 compliant, so you can drop it from a height of almost 5 feet (case on) or 4 feet (case off), and it'll absorb the shock. And the tablet's long-lasting battery is ready to power through just about any project.

Manage mobile devices more easily.

Zonar Mobile Shield™, which comes pre-loaded on each Tab Active5, prevents users from downloading additional, unauthorized apps. No movies, programs, games or media to distract drivers, especially while they're driving.

Mobile Shield's lockdown feature and enterprise-grade security fits any size implementation. Regardless of how many—or how few—Tab Active5 tablets you deploy, each is configured with the same capabilities, security and features.

Updates are pushed over the air, so you can grow your technology capabilities with minimal interruption. The tablet's operating system will also stay current and updated on its own.

Key features

- Zonar and Google Play certified
- Ruggedized design
- IP68 dust- and water-resistant
- MIL-STD 810G certification
- MIL-STD-810H2 compliant
- Zonar Mobile Shield device management
