

Equip drivers with one workflow, on one app.

Bring every essential tool together.

Put every tool your drivers need at their fingertips—on one mobile application. MobileCommand™ is a customizable app that brings together the key tools drivers use to do their job, in and out of the cab. They get what they need, when they need it, with the same interface and the same app every time—on any device, including their in-cab tablet.

One app to install. One login to remember. One interface to learn. Every essential tool in one place.

Replace frustration with real-time communication.

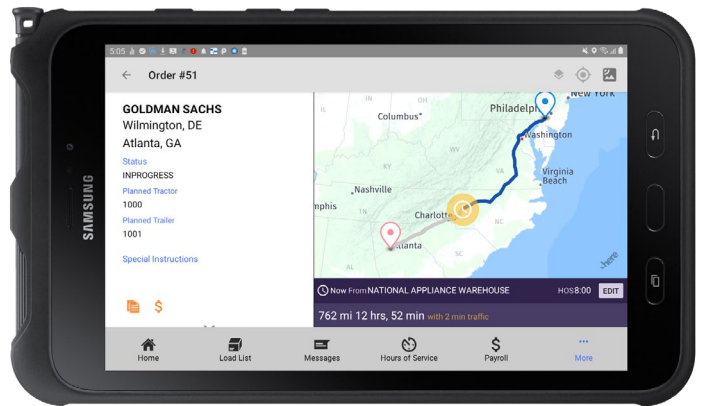

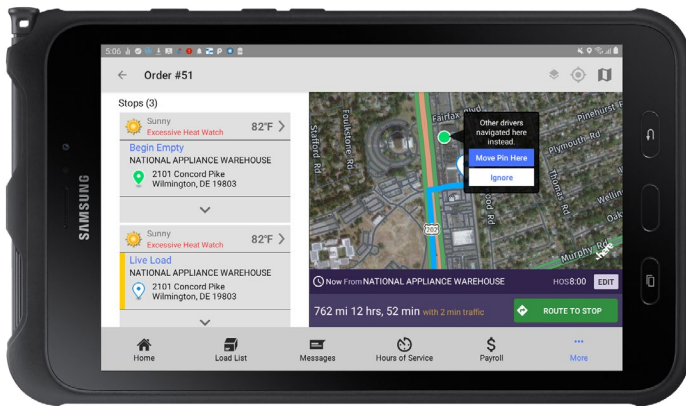

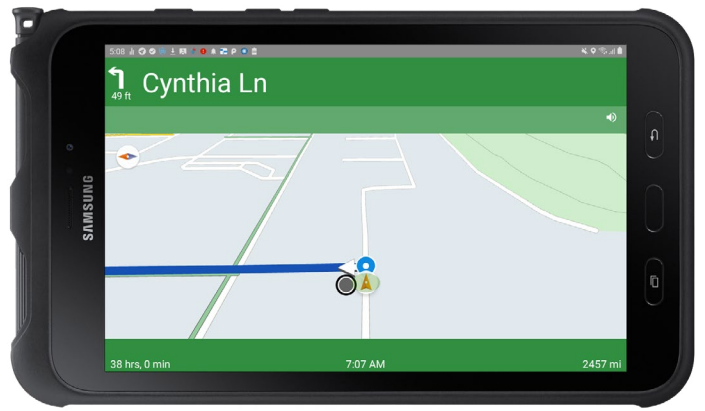

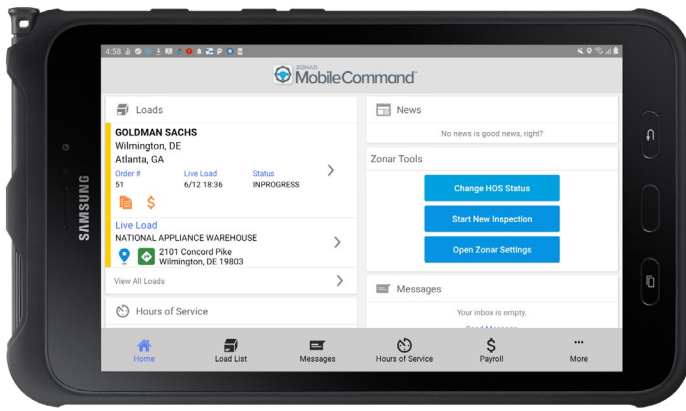

Transmission delays slow communication and, in turn, your operation. MobileCommand™ directly connects drivers and driver managers using real-time, two-way messaging. And because everything happens inside a single app, drivers never switch screens or hunt through different tools just to see what their manager is saying.

Streamline communication through one interface to make drivers' and driver managers' lives easier—and help your fleet run more efficiently.

Automate trip management and oversee your fleet in real time. Plus, keep drivers informed with driver-manager messaging and a company newsfeed.

Key features

- Available on iOS and Android devices
- ELD integration
- In-depth trip planning solution
- Voice-guided, turn-by-turn navigation
- Equipment locator
- Intelligent locking to prevent distracted driving
- Two-way, real-time messaging
- Guided exception-reporting screens
- Dynamic forms
- High-quality document scanning
- Task lists
- Built-in payroll
- Newsfeeds and media libraries
- Customizable workflows
- Support for offline operation

Pilot a proven, effective integration.

Used by some of the largest for-hire trucking fleets in the world, Zonar and Eleos technology integrate to create a powerful fleet-management and driver-workflow solution. This integration is already proven in the field, which is how we know MobileCommand™ works—and why we're building on that foundation.
