

Finally, run your school bus fleet with a single all-in-one routing ecosystem.

What's in it for dispatchers

Manage entire fleet from one dashboard.

Build new routes from scratch.

Integrate third-party routes.

Streamline daily workflows.

Make & push updates on the fly.

Capture planned vs. actual more easily.

Optimize fleetwide efficiency with smarter, more flexible routing.

Build new & integrate third-party routes. Push updates, live.

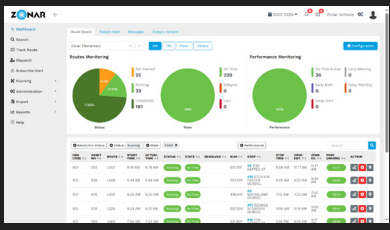

Manage planned vs. actual on-time performance.

Ease communication for dispatch, drivers, & families.

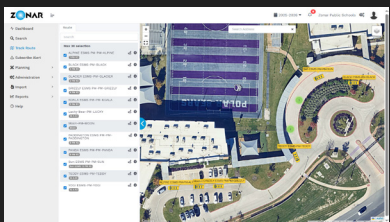

Know who's on board, instantly.

Integrate Zonar Z Pass® to digitally track student ridership through Zonar Bus Suite.

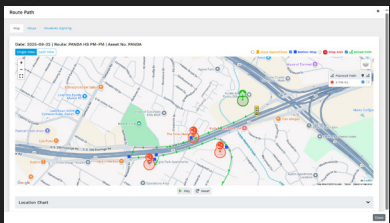

- Dispatchers see who's on board and who exited the bus, when and where—in real time.
- Drivers immediately verify right student, right stop, on their tablets.
- Parents set up alerts to know where and when their child boarded and exited.

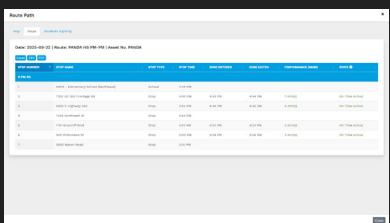

Monitor & manage your entire fleet, on one dashboard.

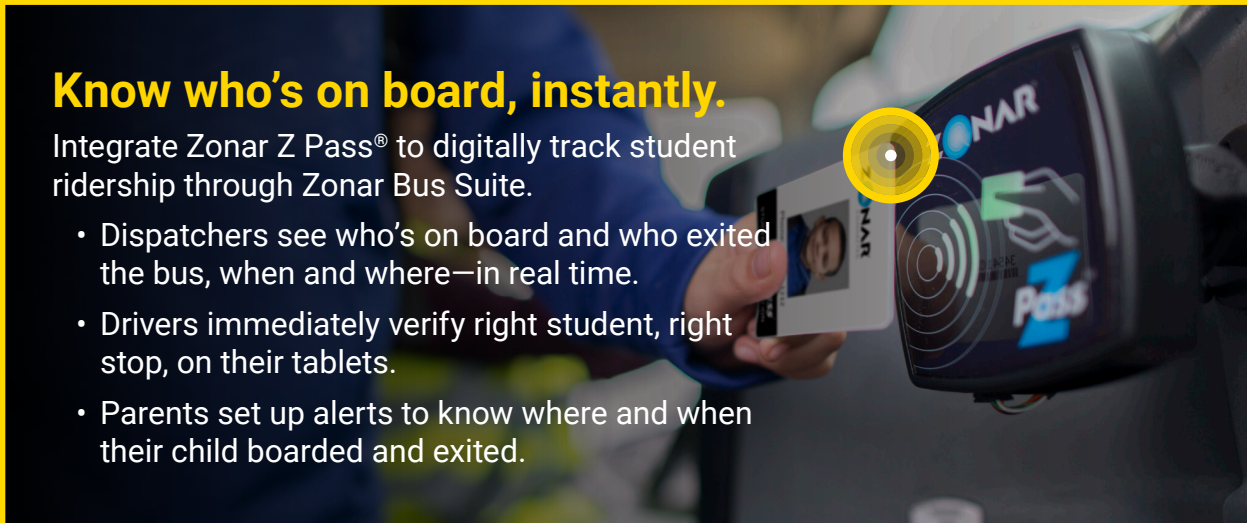

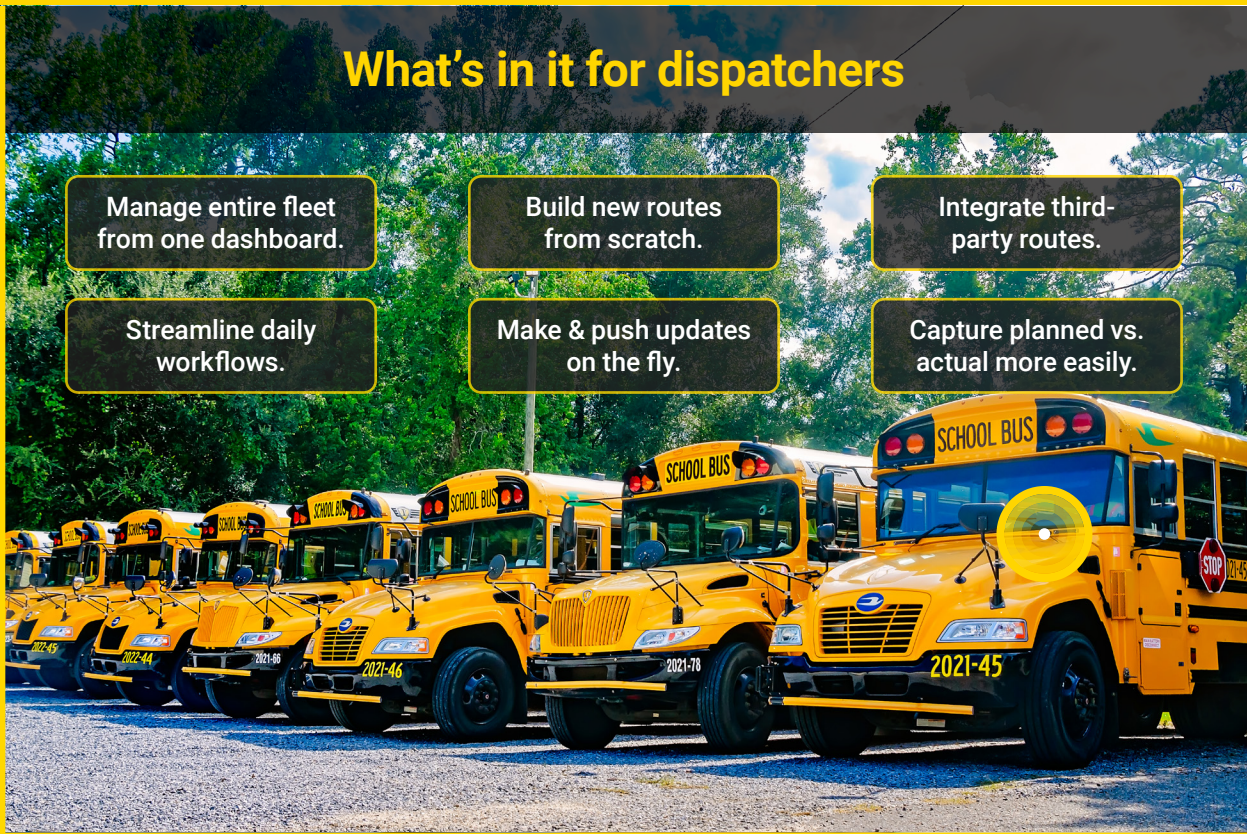

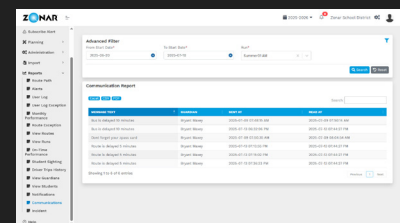

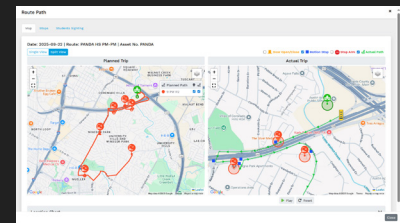

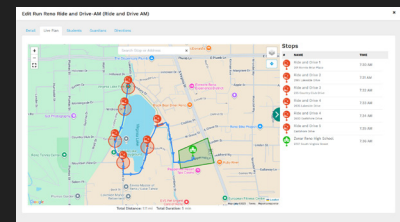

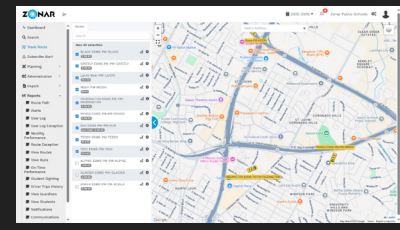

View live school routes, runs & vehicle performance.

See when stop arms deploy & doors activate for each stop.

Monitor skipped or missed stops for each route & run.

What's in it for drivers

Have every driver tool needed in a single, integrated app.

Trust that runs on their tablet are always up to date.

Arrive on time, more easily with turn-by-turn directions.

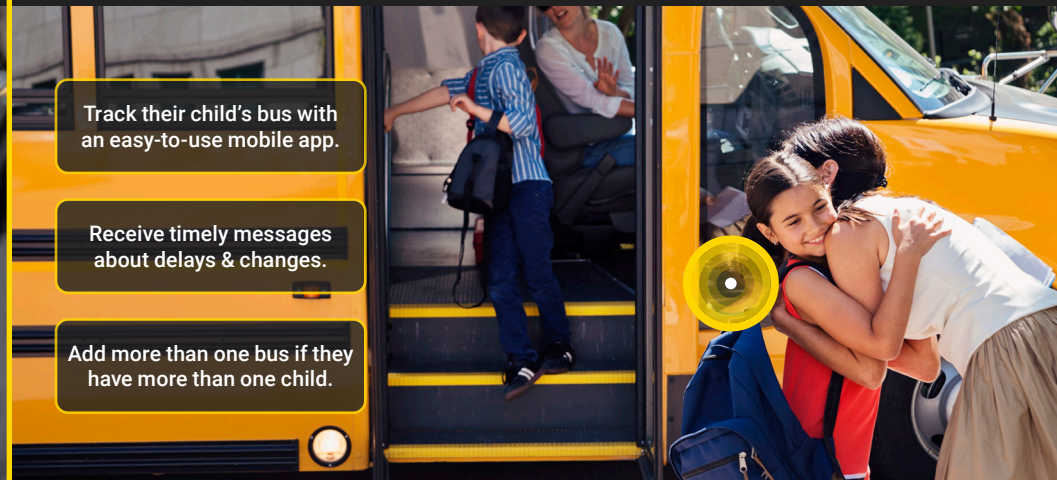

What's in it for parents

Track their child's bus with an easy-to-use mobile app.

Receive timely messages about delays & changes.

Add more than one bus if they have more than one child.

Connect and control, with an all-in-one platform.

Zonar Bus Suite is a complete school bus ecosystem that combines advanced routing and telematics. Reduce costs and enhance service by running your entire operation from a single platform that scales with your fleet. And that features everything you need to operate like clockwork. All aboard?
