

## Take us for a test drive.

If your Thomas Built Buses vehicle came line-fit with a Zonar V4™, activate your 60-day free trial.

Enhance efficiency with online, anytime fleet monitoring. See real-time bus location, activity and performance from any desktop, laptop, tablet and smartphone. Set alerts for unsafe and inefficient driving, including speeding, excessive idling and out-of-route miles. Track key bus functions such as wheelchair-lift activations, stop-arm operations, and door openings and closings.

### Included in your Zonar trial subscription

- Secure, online fleet management platform
- High-def GPS location tracking, and intelligent logging that captures detailed vehicle activity
- Live Maps to view real-time bus location and status
- Detailed activity, efficiency, performance and vehicle health reports
- High-resolution path data to view actual vehicle trip information
- Idle reporting to see which vehicles were idling over company policy—and where
- Dynamic geofencing to see which buses left the yard late, early or on time
- Speed reporting to identify when and where specific vehicles traveled over the speed limit
- Real-time alerts sent to your inbox
- 24/7/365 U.S.-based Zonar support
